

Enhancing Front Desk Check-in Solution

Assimilated Technologies (S) Pte Ltd, offers an interface solution for enhancing Front Desk operations in the Hospitality Industry. We are using state of the art range of Passport/ID Scanner & Signature Pads, with Passports & ID Card Recognition Engines which assists the hotel front desk operation improve productivity services and save cost in long term. This solution also complies with the requirement to meet government regulations.

The Passport/ID scanner allows quick and accurate population of guest credentials from document into the hotel's guest profiling system.

The Signature Pad can display the hotel's Registration Card and Tax Invoice for guest verification before signing electronically into the system. Hence, help the hotel save on the printing cost of paper. It can also display slideshow or hotel promotions, because the Signature Pad can be used as an extended monitor display to your computer. The application can be limitless; we can customize the solution to your requirement.

Implementing these solutions provides the hotel staff the tools they need to handle reservations, checking guest in and out, and managing rooms more effectively and efficiently. Ultimately re-inventing the way you interact with your customers, making them feel more welcome.
