

Biometric Access Control / Time & Attendance

A biometric time, attendance and access control system that uses unique fingerprint physiological characteristics to manage employee's attendance and access in company premises.

Biometric time and attendance have become the most convenient and popular application of biometric technology used at business firms, schools, shopping malls, hotel and casino's, construction sites and other companies and organizations because of their many benefits.

What are the advantages of a biometric time, attendance and access control?

- ❖ Prevents buddy punching, no early punching, late punching and time theft
- ❖ Eliminates the need to produce access card; saving workforce, time and costs
- ❖ Web based system allows multiple users to access and manage database
- ❖ Allows you discrete control of employee access to secured, highly restricted areas and checkpoints
- ❖ Makes it easy to keep track of all employee movements across all company offices from a central server
- ❖ Eliminates the use of paper
- ❖ Easily generates various reports based on a variety of criteria
- ❖ Reduces time and attendance costs
